About Me

My name is Benjamin Hübner and I´ve been working for almost 10 years online now. I started in the marketing niche, but expanded my business to trading and cryptocurrencies as well! I´m also a co-founder of Adzbuzz and Adzcoin, a new and innovative Cryptocurrency that is related to a social network that pays its members for their social activities and of course, for well-written contents! Inside this short report, I will reveal to you how to use this social network to directly earn money from your website traffic, without the need to care about conversions or anything!

Depending on your traffic, you won't get rich overnight, but you can easily add an additional income stream using this method in just a few minutes of work!

How it Works

[Adzbuzz](#), the social network connected to Adzcoin (the currency) runs the Adzbuzz Publisher Program to reward webmaster and Blogger for high-quality contents! In order to apply for this program, you just need a website with your own domain and of course, a free Adzbuzz Account (This will also be your Adzcoin wallet for your earnings and when done right, you can get some

quality traffic from Adzbuzz too!)

The idea is to add a small icon on the border of your website to promote Adzbuzz and get paid on a daily basis depending on your website traffic (Not Clicks or anything)!

System Setup – Step by Step

1. **Ensure that you take the first step now and [sign up for Adzbuzz](#) entirely free!**

Confirm your email afterwards and log into Adzbuzz!

2. If you have signed up to Adzbuzz, then you have already taken the first step to set up your Adzbuzz Publisher Account! Now, click on the button on the right top corner (See Pic) and click on Settings afterwards!

Scroll down a bit till you see the Adzlink 2 section (See Pic below). The "Adzbuzzer" above is a sharing Plugin/Button for your website so visitors can share content on Adzbuzz.

3. If you are using WordPress, you can simply download the Adzlink Plugin (and the Adzbuzzer Plugin if you like additional traffic) and install it on your Website! Ensure you copy

your Publisher Key below the "Get Code" button, you need to add this code inside the Plugin Configuration to start earning!

In case you want to install the Adzlink on your static website, ensure you choose a template and click on "Get Code" – afterwards, follow the instructions inside the pop up (Simply copy and paste like the Google Analytics code)!

So, in summary:

1. [Sign up](#) at Adzbuzz for Free.
2. Click on Settings inside the Profile menue. (Click on your profile pic) and click on the Publisher tab afterwards!
3. Download the Plugin or copy the Code to add it to your website.
4. Install the plugin or past the code inside your header.

Earnings Potential

This depends on many different factors, here are a few of them:

- Adzbuzz Earnings – Since your earnings are paid from the Adzbuzz Profits, it is an important factor when it comes to determining your earnings!
- Your Website Traffic – More traffic will result in more earnings from Adzbuzz! So start creating content and promoting it to massively increase your earnings from the Adzbuzz Publisher program!
- The ADZ value – Since you get paid in Adzcoin, the Adz value is important because it determines your earnings too! (ADZ is valued at approx. 8-10 cents at the moment!) Don´t worry, you can exchange ADZ into BTC or USD in just a few clicks to access your funds whenever you like!

So you see it's hard to determine your real earnings of course, but why not simply try it out! All you have to lose is 2-3 minutes of your time!

My website Adzvault.com already generated more than 120 USD in ADZ earnings by now, keep in mind that it is a completely new website with almost no traffic at all (Approx. 1-10 visitors a day). And yes, after a one month period, they are directly payable to your wallet or you can use them for the Adzbuzz Advertising program (lifelong advertising without any real cost, keep an eye on your inbox for more info in the next days).

(Hint: Take a look at the plugin on the end of this report to increase your traffic, affiliate earnings and of course Adzbuzz earnings easily!)

Additional Adzbuzz Features and Services

Advertising Program – Exchange your ADZ for Advertising Credits and get daily Adviews without any cost, (you won´t lose your AD Credits, and you can sell them again later on).

Adzbuzz Community Feature - What would you say if someone else cares about your social marketing and gets paid by Adzbuzz – Take a look at the community feature.

Adzbuzz Service Market – This is a Fiverr-like Marketplace for mini jobs! If you are a Fiverr seller, ensure that you take a look at this opportunity to increase your reach. Click here to take a look at the service market!

Adzbuzz Savers – This is a database where you can search for coupon codes or post your own if you sell something.

Adzbuzz Hosting – If you want to start from the scratch, make sure that you get your hosting account here and support Adzbuzz at the same time.

More will follow soon… So I highly recommend that you take at least a look at Adzbuzz and the Publisher Program!

Conclusion

Adzbuzz and Adzcoin are relatively new, and Adzbuzz Beta just launched some months ago, so there are many updates and new features going live in the near future! There is also a high potential for Adzcoin to become a leading cryptocurrency as it is backed up with some real value (Each ADZ equals a specific amount of daily ad-views on Adzbuzz and partner sites click here to read more). Keep an eye on your inbox to learn more about this interesting currency and business opportunity!
